love website view  
way rewards maps  
latest getting number crashes  
works search hotel nights  
features reward information  
stay tried actually message  
many change now better please even also  
start invalid log well isnt thing horrible think  
feature log awesome like update great  
must ive using time  
first date password version just site  
useful phone new used quick point look  
business need function give job worth info full thanks people sign problem  
disappointed show fix reservation current bugs functionality card user  
want review really points terrible screen lot thats pretty will support nice  
platinum updates clunky booking never come work slow login keep easy finally  
member stays ipad one room address complete paste interface right add made  
much error remember mobile option easier poor year upcoming  
passbook cant account doesnt back  
check company good use button  
best calendar find every iphone logged see  
make needs waste useless hotels
