hotel works remember functionality
information error search hotels
company crashes doesnt use please
view bad login passport confirmation
needs find nothing
dont finally good much reservation nights
still nice web always actually never check
wont review awesome call love let time function option
people anything date site right best horrible must next getting worked can
clunky shows isnt stay full back need useless want ipad
longer able current platinum interface bugs useful or add really easier message
support last info features problem point pretty terrible number job one
well like address done quick trying updates member look tried access
ive looks will new icon thanks latest feature seems first wait sign reward
instead major business spg maps enter change made better card points poor logged
account thats since used mobile make website also
book get just work password every makes
update come reservations log waiting button
slow rewards version now
travel great cant room improvement etc
calendar user many
using
