improvement remember card message know passbook works point
website see points better waiting
really logged paste give anything longer finally
disappointed worth try start hotels
horrible support ever want best shows thing function right mobile
login fix easier next thing start hotels
will nice screen company need update useless account
love view page icon room check wait quick fine thanks
enter sign able brand got maps awesome full information features bad also
useful year now back can user done log isnt call nights address
clunky one that think job updates spg let major work just cant travel
stays platinum making tried instead hotel error made current latest many
calendar look booking worked disointing poor way complete stay needs
actually customer search ability phone show button option functionality
easy every dont crashes access info makes come reward etc
designed confirmation pretty problem review allow must wont slow great
still even ipad terrible number last time
doesnt using make version date add waste since book
bugs member iphone new much upgrade reservation
use rewards
